PROFILE

Senior full stack web developer with nearly 20 years of experience building web applications, CMS-driven websites, and digital products using Laravel, Vue, React, and TypeScript. Strong in back-end architecture, front-end systems, CMS implementation, and UX/UI thinking, with a track record of owning projects from concept through production. Brings a pragmatic, AI-assisted workflow to shipping quickly while maintaining strong engineering quality.

EXPERIENCE

geniant

2022 - PRESENT

Senior Full Stack Developer

- ◆ Lead full-stack delivery across websites, internal tools, MVPs, design systems, and custom applications.
- ◆ Work across the entire stack, from React and Vue front ends to headless APIs and full-stack builds using Laravel, Python, Nuxt, and Statamic.
- ◆ Contribute as an independent senior developer, paired within front-end and back-end teams, collaborating with in-house and nearshore developers, and as lead developer for a small full-stack team.
- ◆ Operate with minimal PM oversight, working directly with clients and designers to keep projects on track.

52projects

2014 - 2021

Lead User Experience Engineer

- ◆ Led UX and front-end development for a suite of SaaS products serving faith-based organizations.
- ◆ Owned interface design and front-end implementation in close partnership with product and engineering teams, while managing and mentoring a small UX team.

Fellowship Technologies

2011 - 2014

User Experience Engineer

- ◆ Designed and built production-ready front-end experiences for Fellowship One, a leading church management platform.
- ◆ Translated product requirements into usable, maintainable front-end systems across both mature products and new initiatives.

Pursuant

2007 - 2010

Web Services Developer

- ◆ Started in digital marketing production and moved into custom website development and themeable WordPress implementations for nonprofit and university clients.
- ◆ Built foundational experience in HTML, CSS, PHP, WordPress, and client-focused delivery on a small cross-functional team.

SKILLS

CORE

Laravel, PHP, Vue, React, TypeScript

FRAMEWORKS

Inertia.js, Livewire, Statamic, Nuxt

FRONTEND

Design Systems, Storybook, Tailwind, Sass, Plain ol' CSS

DATA + APIS

MySQL, PostgreSQL, Redis, API Architecture

WHAT I BRING

- ◆ Full-stack delivery from concept through production.
- ◆ CMS architecture and content systems that scale.
- ◆ Front-end systems with strong UX and interface consistency.
- ◆ Collaborating with AI tools to accelerate delivery without sacrificing quality.

EDUCATION

University of Texas at Dallas

Bachelor of Business Administration
2007
